March 22, 2016

Attention: Kim Richardson

We acknowledge that TTSAO provides the core fundamental skills and knowledge base required of a professional transport driver and a graduate of a TTSAO approved school could be considered a preferred hiring candidate for professionally managed fleets.

Such a fleet would be well-served to consider TTSAO graduates and upon hiring, proceed to provide these new hires with driver training specific to their operation, resulting in a driver with the most appropriate level of qualifications.

We would consider such an approach in keeping with a proper risk management program and we could consider providing quotations on fleets that properly incorporates TTSAO graduates into own fleet safety culture.

We trust this clarifies The Guarantee's position regarding TTSAO graduates entering the Transportation field.
